

Geothermal Feasibility Scorecard

1. Space Requirements

- Horizontal Loop: 1,500 - 3,000 sq ft per ton of capacity.
- Vertical Loop: 15-20 ft spacing between 200-500 ft boreholes.

2. Sizing Estimation

Required Capacity (Tons) = Home Sq Ft / 500

3. Efficiency vs Gas

Geothermal COP: 3.0 - 5.0 (300% - 500% efficiency)
High-Efficiency Gas: 0.95 (95% efficiency)
